Topic: Target Pharmacy is offering a \$4 Generic Drug Program

Target Pharmacy is now offering their **\$4.00 Generic Drug Program** throughout the United States.

The Program includes 315 generic prescriptions available at commonly prescribed dosages. According to www.rxlist.com, the list includes many of the top 20 prescribed medications in the United States.

Generics contain the same high quality active ingredients as their brand-name counterparts and are equally effective, but cost 30% to 60% less than equivalent brand-name drugs. Generic drugs are only approved or certified by the FDA after it is satisfied that they are safe and therapeutically equivalent to their name brand versions. Therefore, you can be assured that Generic drugs are safe as well as effective as their name brand equivalents. Generics are usually made available after the patents expire on the name brand drugs that treat the same conditions.

Patients interested in saving money on prescriptions through the program should ask their doctor if a generic is available on the list for their name brand prescription and is right for them. The program will save patients money by reducing their **total cost** to \$4.00 per eligible generic drug dispensed by a Target Pharmacy, even though our pharmacy benefit plan has a higher generic drug copay. This means that the patient will not pay more than \$4.00 for each Generic prescription filled at Target Pharmacy.

We have attached Target Pharmacy's generic drug list for your convenience. You can review the program in more detail by visiting Target's website at www.target.com and click on the \$4.00 Generic Drug Program topic.

If you have any questions regarding the information in this announcement, please contact your GBS Customer Service Representative at (410) 832-1333 or (800) 337-4973.
